ATELIER 1 : CALCUL ET TRACÉ ELEMENTAIRES DE DROITES DE HAUTEUR

Exercice 1.1 - Drawing Line of position on plotting sheet

At 05h13min, DR position, $19^{\circ}20' N$, $116^{\circ}50' E$., two observations of stars were taken as follows:

1. Star 1 - Bearing $110^{\circ} T$, intercept $4'$ away.
2. Star 2 - Bearing $030^{\circ} T$, intercept $5'$ toward.

Find the ship's position

Correction partielle

Ce tracé est à faire sur un plotting sheet pour lire la position (latitude/longitude) du point

A. Charbonnel	CORRECTION - DROITES DE HAUTEUR NA	2/17

Exercice 1.2 – Sight seeing reduction/ LOP with stars

Correction partielle

In the evening, 17th July 1981, at DR position $40^{\circ} 25'N$, $32^{\circ} 40'W$, the chronometer showed 10h 21min 07s, chronometer error 4min 09s fast.
 Observed Star Dubhe with sextant altitude $43^{\circ} 32,0'$ and star Deneb with sextant altitude $38^{\circ} 12,3'$; index error 2,3' on the arc; height of eye 15 m.
 Find intercepts and positions lines.

Define GMT

Chronometer Time	10h 21min 07s	
Chronometer Error	- 4min 09s	Fast - / Slow +
Time GMT [12h]	10h 16min 58s	
GMT	22h 16min 58s	Time on 24h

Intercept for Dubhe

Define LHA* et D* for Dubhe

GHA γ	$265^{\circ} 38,0'$	NA - à l'heure ronde = 22h00	
+ Δ GHA γ	$4^{\circ} 15,2'$	Pour $\Delta t = 156\text{min } 58\text{s}$	
= GHA γ	$269^{\circ} 53,2'$	À l'heure précise = 22h 15min 58s	
+ SHA*	$194^{\circ} 21,9'$	NA	D* = $61^{\circ} 51,4'N$
GHA*	$104^{\circ} 15,1'$	$464^{\circ} 15,1' [360]$	
- Ge	- $32^{\circ} 40,0'$		
LHA*	$71^{\circ} 35,1'$		

Calculate hc

$$\begin{aligned} \sin h_c &= \sin \phi_e \cdot \sin D + \cos \phi_e \cdot \cos D \cdot \cos LHA \\ &= \sin(40^{\circ} 25') \cdot \sin(61^{\circ} 51,4') + \cos(40^{\circ} 25') \cdot \cos(61^{\circ} 51,4') \cdot \cos(71^{\circ} 35,1') \\ &= 0,685 \\ \rightarrow h_c &= 43^{\circ} 14,7' \end{aligned}$$

$$\mathbf{Hc = 43^{\circ} 14,7'}$$

Calculate Zc

$$\begin{aligned} \cos AZ_c &= \frac{\sin D - \sin \phi_e \cdot \sin h_c}{\cos \phi_e \cdot \cos h_c} \\ &= \frac{\sin(61^{\circ} 51,4') - \sin(40^{\circ} 25') \cdot \sin(43^{\circ} 14,7')}{\cos(40^{\circ} 25') \cdot \cos(43^{\circ} 14,7')} \approx 0,78901 \\ \rightarrow AZ_c &\approx 38^{\circ} \\ LHA &= 71^{\circ} 35,1' \rightarrow Z_c = 360^{\circ} - AZ_c \end{aligned}$$

$$\mathbf{Zc = 322^{\circ}}$$

Exercice 1.3 – Sight seeing reduction / LOP with the SUN

At 0900 LMT, 25th October 1981, DR position 43°15' N, 38°25' W, the chronometer shows 11h 40min 32s, chronometer error is 2m 20s slow.
Sextant altitude of the sun's lower limb is 24°02.3' ; index error 1.5' off the arc; height of eye 12 m.
Find intercept and position line:

Define GMT

Ge/15 = 2h 33min 40s

Chronometer Time	11h 40min 32s	Approx LMT	09h00
Chronometer Error	2min 20s	Fast - / Slow +	+ Ge 2h 33min 40s
Time GMT [12h]	11h 42min 52s	Approx GMT	11h 33 min 40s
GMT	11h 42min 52s	Time on 24h	

Define LHA/GHH et D

GHA _a	348° 58,5'	NA - à l'heure ronde = 11h00	D	12° 09,0' S
+ΔGHA _a	10° 43,0'	Pour Δt= 42min 52s / d=0,9	+ΔD	+ 0,6'
= GHA _a	359° 41,5'	À l'heure précise = 22h 15min 58s	D	12° 09,6' S
- Ge	- 38° 25,0'			
LHA_a	321° 16,5'			

Calculate hc

$$\begin{aligned} \sin h_c &= \sin \phi_e \cdot \sin D + \cos \phi_e \cdot \cos D \cdot \cos LHA \\ &= \sin(43^\circ 15') \cdot \sin(-12^\circ 09,6') + \cos(43^\circ 15') \cdot \cos(-12^\circ 09,6') \cdot \cos(321^\circ 16,5') \\ &= 0,411 \\ \rightarrow h_c &= 24^\circ 16,7' \end{aligned}$$

$$H_c = 24^\circ 16,7'$$

Calculate Zc

$$\begin{aligned} \cos AZ_c &= \frac{\sin D - \sin \phi_e \cdot \sin h_c}{\cos \phi_e \cdot \cos h_c} \\ &= \frac{\sin(-12^\circ 09,6') - \sin(43^\circ 15') \cdot \sin(24^\circ 16,7')}{\cos(43^\circ 15') \cdot \cos(24^\circ 14,6')} \approx -0,741' \end{aligned}$$

$$\rightarrow AZ_c \approx 137,8^\circ$$

$$LHA > 180^\circ \Rightarrow \text{astre à l'Est} \rightarrow Z_c = 138^\circ$$

$$Z_c = 138^\circ$$

ATELIER 2 : TRANSPORT DE DROITES

Exercice 2.1 : Canevas de Mercator & UPS

(AST-RF001)

DR : 40° 05,0'N / 131°45,0'W

Two celestial observations of stars were taken simultaneous as follows:

- star 1 - Bearing 110° T, intercept 4 away.
- Star 2 Bearing 030° T, intercept 5 toward.

Plot the line of position and define the position

Exercice 2.2 : Sight reduction for stars

(AST-RF002)

Un navire suit une route fond au 235° à la vitesse surface $V_s = 14$ nds, le courant est nul.

A 07:38 Tcf, $\phi_e = 45^\circ 44'$ N et $G_e = 012^\circ 00'$ W.

On a trouvé pour les observations de 3 étoiles :

- Alkaid Tcf = 07h 32min 15s : $Z_c = 300^\circ$ / Ho – Hc = 0,5'
- Arcturus Tcf = 07h 38min 03s : $Z_c = 261^\circ$ / Ho – Hc = 2,2'
- Schedar Tcf = 07h 44min 07s : $Z_c = 041^\circ$ / Ho – Hc = -3.7

Tracer le point d'étoiles pour 07h38 min Tcf

Exercice 2.3 : Sight reduction and running fix for the Sun

(AST-RF003)

At 0900 zone time, on 23 September 1981, your DR position is LAT 28°48.0'N, LONG 153°11.5'W.

You are steering course over ground 257°T at a speed of 18.0 knots.

You observed 3 following morning sun lines (lower limb).

Zone Time	Sextant Altitude
09h 15min 14s	39° 50,4'
09h 50min 04s	46° 11,2'
10h 20min 17s	51° 09,8'

The height of the eye is about 10,5 m.

The index error (IE) is -2,1'

Determine the latitude and longitude of your 10 h 20min running fix.

Exercice 2.4 : Sight reduction & running fix for stars

(AST-RF004)

On May 16th 1981, the navigator takes and records the following sights :

	Sextant altitude Hs	Observation Time (ZT)	Estimated position
Kochab	47°19,1'	20h 07min 43s	39° 05,1' N, 157° 08,0' W
Spica	32°34,8'	20h 11min 26s	39° 06,3 N, 157° 10,0' W

Height of eye is 48 feet and index correction (IC) is +2,1'

Determine the position at 20h 11min ZT

ATELIER 3 : PROBLEMES DIVERS

Exercice 3.1 Sight reduction Sun/Sun

(S2)

On June 6th 2025, you are sailing in Mediterranean Sea.
 You are steering course over ground 120°T at a speed of 10 knots
 Your dead reckoned position is 40° 01,0' N / 005° 43,0' E at 12h 10min UT
 Your sextant have an index correction 1,4' on the arc.
 You make the following sight at the eight of 9,5m
Make a fix at 11h 59 min UT.

Time sight (UT)	Hs	Position	
09h 59 min 05s	62° 37,5'	40° 01' N	05° 43' E
11h 58min 31s	72° 43,2'	39° 51' N	06° 05,5' E
